

Custom Rail Truck

If you can dream it, Brown Rail can design and build it.

Brown Rail is a leading manufacturer of customized rail trucks. We build highly customized rail trucks in less time than most. From welding to rail testing applications, built on a heavy or medium duty chassis, if you can dream it, Brown Rail can build it.

Turn your next customized rail truck into reality in less time with Brown Rail.

Car Mover

Brown's newest rail vehicle combines the benefits of a Car Mover with those of a Grapple Truck. This new "hybrid" Car Mover generates 20,000+ lbs tractive effort with ease.

Versatility

The Brown Car Mover is one of the most versatile rail trucks allowing you to move rail cars one day, then conduct track maintenance the next. This versatility creates superior value allowing your fleet to do more work with less vehicles.

Outrigger

Unlike competitive solutions that require outriggers to be fully deployed, Brown outriggers can be deployed **independently** from each other to avoid obstacles and adapt to the terrain.

Since 1946, Brown Industries has helped companies move cargo from location to location by manufacturing quality-built van bodies, curtainsides, and flatbeds. More recently, Brown has grown their portfolio of customized vehicle solutions to include trolleys and rail vehicles. Headquartered in Lawrence, KS, Brown Industries is part of B12 Transportation Group of Kansas City, MO. To learn more, visit www.bcv.com.

HY-RAIL MAINTENANCE VEHICLES

CORPORATE CAPABILITIES

Car Mover

Custom Rail Truck

Medium Duty Section Truck

Inspector Truck

RAIL EQUIPMENT

by Brown Industries, LLC

Supervisor Vehicle

Brown Rail is an upfitter of rail gear for several different OEMs including the Toyota 4Runner.

Inspector Truck

The Track Inspector makes riding down the rails in a Ford or Chevrolet pickup truck simple.

Learn more about how Brown can upfit your fleet of commercial pickup trucks with Hy-Rail gear that meet FRA regulations.

HD Inspector Truck

What does the "HD" in "HD Track Inspector" stand for? Heavy Duty.

Brown engineers build the body of each HD Track Inspector over a larger chassis to stand up to the most extreme environments.

Throw in optional Oxygen/Acetylene equipment and hose reels, custom-built side tool boxes, and you've got the most reliable truck on wheels, rubber, and steel.

Medium Duty Section Truck

Make life on the rails easier and more productive with Brown Rail.

Brown outriggers are deployed **independently** providing greater flexibility for obstacles and grades.

Did you know that Brown installs all relays, fuses, circuit breakers and solenoids in one location? Also, there is only one ground for easier troubleshooting.

Brown Rail makes rail maintenance easier and more productive.

Grapple Truck

Make life on the rails easier and more productive with Brown Rail.

Brown Grapple Trucks are available with standard A-frame stabilizers, or the unique, independent out and down stabilizers that provide greater setup flexibility for obstacles and grades.

Did you know that Brown installs all relays, fuses, circuit breakers and solenoids in one location? Also, there is only one ground for easier troubleshooting.
